

Our mission is to transform and end homelessness in the South Bay through education, advocacy and coordination.

- Identify service gaps and highlight programs that work.
- Advocate for the development of additional service and fiscal resources.
- Strengthen communication and collaboration among key South Bay stakeholders.
- Identify and provide training and educational opportunities.

We actively engage in activities that offer not only compassion, but also provide solidarity, empowerment and lasting solutions.

- Provide leadership in the Greater Los Angeles Homeless Count, which collects vital statistics identifying where those who are homeless reside and the specific reasons for their homelessness.
- Create regional and individualized city information sheets on what homelessness looks like based on the Greater Los Angeles Homeless Count.
- Create resource referral cards that both organizations and those experiencing homelessness can use to make appropriate connections.
- Track funding sources to build capacity and provide leadership in coordinating agencies to effectively respond to fiscal opportunities.
- Work with local stakeholders to understand homelessness and proven solutions.

We represent those in Los Angeles County's Service Planning Area (SPA) 8. Our membership includes key organizations from a range of government sectors, local service providers, faith and community partners.

- From our community-based origins in the late 1980's, we continue to value grassroots support and the power of collaborative solutions that unite and focus our membership on the complex problem of homelessness.

Join us! We meet on the 4th Wednesday of each month from 9:30-11:30 am.
